

Dental Radiology Program in Florida: Comprehensive Training to be a Dental Professional

[Dental radiology](#) is an important part of dental care. If you are looking for a dental radiology program in Florida, you have come to the right place! Our program offers comprehensive training that will prepare you to be a dental professional. In our program, you will learn how to use dental radiography equipment and interpret images correctly. You will also learn about the different types of radiation and how to protect yourself and your patients from radiation exposure.

The Florida dental radiology program is designed to help patients with X-rays and other tests that require radiation exposure. With this technology, you can get an accurate reading on your mouth without ever having any discomfort or risk of injury during the visit!

Consider investing in a degree that will give you the skills to work with computers and other technologies. Dental radiology programs offer an excellent way for people who want more than just treatment options but also understanding about how everything works together from start-to finish!

The Florida Dental Radiology Program is a growing field, and this program will help you get started. It has been an amazing journey so far with many opportunities to grow both personally as well professionally!

Radiology Certification

This program is ideal for Dental Assistants moving to Florida or a Florida Dental Assistant that has been formally trained by a licensed dentist.

A minimum of three months experience in dental assisting and exposure of dental x-rays are required to receive certification. Students in the [Dental X-ray course](#) must be able to perform these skills in a clinical setting and pass an online written exam with a grade of 75% or better to be issued a Florida Dental X-Ray Certification.

For the purpose of positioning and exposing radiographs by dental assistants, formal training may consist of having received certification as a dental radiographer pursuant to Rule Chapter 64B5-9.011, Florida Administrative Code (F.A.C.). The requirements for certification include: Completion of at least 3 months of continuous on-the-job training through assisting in the positioning and exposing of dental radiographic film under the direct supervision of a Florida licensed dentist.

Foundational Science of Radiology in the Dental Office Test.

The written portion tests the science and foundations of radiology in the dental office. After payment is received you will receive a study guide to help prepare for the test. It includes all study material necessary to prepare you for your actual written tests for radiology certification. You should schedule your test within 2 weeks of receiving your study guide.

Clinical Demonstration of Radiology Techniques:

Once you have successfully completed the written examination portion with a score of 75% or better, you will proceed to the Clinical hands on portion of the certification. You will complete the hands-on portion in our facility and demonstrate your ability to place, position and expose dental x-rays.
